Video Books

Our Video Print products quickly capture attention and make lasting impressions.

Adding a video screen and audio into your custom printed product - **transforms your message into an experience** that leads to much higher retention rates and can greatly improve your marketing conversions.

One of the most powerful marketing tools comes with the largest selection of custom options:

- Choose your Screen Size
- Choose the printed packaging that surrounds it
- Choose the best storage size for your video
- Choose playback controls for your video
- Choose how your video starts playing
- Choose to package products with your video
- and much more!

This revolutionary technology has transformed marketing by letting businesses of all sizes and budgets reach their customers directly. Offering support for a wide range of file formats for picture and video - your message has never looked this good!

Engage Your Audience

Do you have a product to introduce and explain?
Do you have unique facilities or services to demonstrate?

We can help!

Here's how to get started:

Step 1: Packaging Shapes and Sizes

Options for Every Project!

We offer a wide variety of packaging shapes and sizes, along with custom options to ensure each Video Print is perfect for your goals and budget!

Share Your Message

Step 2: Screen Sizes

Whether you are sharing a brief product demonstration, thank you message, or a detailed overview of your services - consider the size of your screen and how a higher resolution lets you show more details and text based information.

Screen Size	Resolution	Aspect Ratio
2.4"	320 x 240	4:3
3"	240 x 400	16:9
4" HD	800 x 480	16:9
4.3"	480 x 272	16:9
5" HD IPS	854 x 480	16:9
7" HD	1024 x 600	16:9
7" HD IPS	1024 x 600	16:9
10.1"	1024 x 600	16:9
10.1" IPS	1024 x 600	16:9

HD and IPS Screens

HD screens will show your video with more crisp definition. IPS screens show vibrant color from all viewing angles in high resolution.

Touch Screens

Touch screen upgrades give your audience a more intuitive and convenient way to navigate your Video Print. From simple actions to full video control - touch screens can help!

Step 3: Memory Size

Most 7" screen units will have a standard memory of 128mb, and can range up to multiple gigabytes. The difference in memory size can mean the difference between a video lasting a few seconds to several hours. Each unit features a USB port for uploading data/video or recharging.

Step 4: Final Touches

Custom button options allow your customers to pause, stop, or even skip to the next video. Matte, gloss printing, or PMS Color Matching is available for your packaging. AVI, BMP, JPEG and most major image/video formats supported.

PU Leather Brochure
ASIVB5PU

Finishing options are available such as adding polyurethane leather textures, hot foil and spot gloss.

Used in Many Industries:

- Real Estate
- Event Planning
- Legal Services
- Small Businesses and Artisans
- Onboarding for Organizations

Lanyards

Waterproof Glow in the Dark Cell Phone Bag

This translucent PVC bag makes it easy to find what you need before you open it! This PVC design also allows you to access the touch screen features of certain devices without bringing them out of the bag. The bag is waterproof, and features triple zip fasteners, and also a hook and loop closure for security. The bag is also attached to a 0.4" polyester neck lanyard. It also glows in the dark so it can be found while out at night, or in a darkened room!

Wool Ski Socks

DSCSO27

What Are Merino Wool Socks?

Merino wool is a natural fiber grown by Merino sheep. It's thinner and softer than regular wool, making it easier on the skin. And when you wear merino wool socks, a lot of benefits come with it such as moisture wicking, regulating temperature, and odor resistant!

Available In A Variety Of Wool Blends!
